Weekend sales remain significantly lower than weekday sales, indicating weak customer conversion during weekends.

Discount Impact & Store Performance Analysis

Sum of Revenue by Store_ID

Total Revenue by Payment_Mode

Total Revenue and Profit Margin % by Discount_Group

Top-performing stores generate nearly double the revenue of underperforming stores.

Discounts above 25% increase sales volume but reduce overall profitability.

Customer Segmentation & Purchase Behavior

INSIGHTS

Returning and loyal customers contribute the highest share of revenue.

Accesories category leads in units sold, making it a high-volume category for the business.

Digital and card payments dominate customer transactions, indicating strong digital adoption.

Recommendations:

- Launch loyalty rewards for returning customers.
- Promote digital payment cashback offers.
- Increase inventory for high-demand clothing products.
- Use personalized campaigns for new customers.
